SPRING CATALOGUE 2020

A NEW PATH

INFINITE POSSIBILITIES

DYNAMIC POWER

DEUTZ-FAHR GO FAHR GO FURTHER

PAGE 21

From the outset, 2020 has been a challenging year for many reasons with the COVID-19 pandemic now forcing us to adapt again to what is becoming the new normal in our way of life. On a positive front, June 2020 saw the sale of tractors breach the 2,000 unit mark in Australia for the first time since 1981 – this was aided by a number of factors including the Federal Government's Instant Asset Write Off incentive as well as more favourable weather patterns. With lockdowns relating to the COVID-19 pandemic beginning to ease in most states, there is a sense of getting back to work amongst the farming community. The continuation of the Federal Government's Instant Asset Write Off scheme will continue to drive purchase activity until the end of December. The biggest challenge will be ensuring availability of tractor stock, as many factories and their suppliers are struggling to ramp up production amidst the increase in demand.

Deutz-Fahr launched their **NEW 8 TTV Series** tractor range last week, this has been smothered in secrecy and little detail is available as I write this! We know there is a new engine, new SDF TTV transmission, and new hydraulic system. The MaxiVision II cab is what we have seen on the 7 and 9 Series, however there is a new cab suspension system which has much better functionality and is more robust. The new 8 Series boasts leading specifications in its class and we eagerly await the opportunity to put it to the test in Australia, once we manage to get our hands on some!

On the other end of the scale, Deutz-Fahr is also launching two new 4E models, a 50 HP and 60 HP tractor. These additions to the already popular 4E Series expand the range offering with two key entry level horsepower tractors whilst still maintaining the high performance and reliability of the Deutz-Fahr brand. These units will have Titan 5500 loaders and 4 in 1 buckets fitted as standard adding up to a great combination package, which we are sure will be a popular choice in this horsepower bracket for our customers.

PAGE 12

Deutz-Fahr tractors are also excited to announce the new venture with Vantage NSW to offer Trimble Agriculture products on the Deutz-Fahr range of tractors in Australia. The latest Trimble GFX-750™ includes an easy-to-use display and roof-mounted guidance controller ensuring your cab will be clean and clutter-free with this automated guidance system. There are three levels of precision, RangePoint, CentrePoint and RTK. Please read more inside for details.

Over the past few weeks Deutz-Fahr Australia was able to secure a cancelled order of various SDF tractors, these are advertised as 'The Italian Look' and have fantastic pricing and great value for money. All units are covered by Deutz-Fahr warranty and service and there are several two-wheel drive tractors available which represent exceptional value to horsepower, as not every job needs four-wheel drive! In the assortment of tractors heading our way, there are also some Agroclimbers (100 HP tracked machines) that are arriving with blades fitted and are definitely worth checking out!

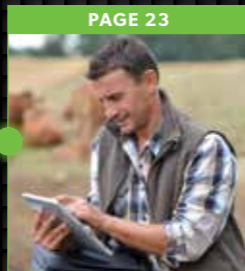

PFG Credit which look after the Deutz-Fahr finance packages have expanded their expertise and can now look after much of the industry needs, including new and used general farm equipment. PFG Credit offer a competitive, easy to use, efficient service for all your finance requirement from your car/ute, machinery and tractors. Over 80% of the deals are signed electronically, so no need to leave home as long as you have internet access! Please give our team a call for your financing needs.

Stay safe.

2 NEW MODELS

INTRODUCING THE NEW KEYLINE SERIES

Deutz-Fahr has launched two new 4E tractor models: a 50 HP and a 60 HP. These additions to the already popular 4E Series expands the range, offering two key entry level horsepower tractors whilst keeping the high performance and reliability of the Deutz-Fahr brand. These units have all the features (and more!) that are expected in this horsepower segment, see below for details.

SDF ENGINE

Liquid cooled direct injection
Euro III / Tier III 3 cylinder engines.

→ **Proven high performance**

INDEPENDENT PTO

Mechanically operated independent
PTO system.

→ **Simple, logical operation**

TRANSMISSION

Simple mechanical transmission design
with logical control layout.
Dedicated forward / reverse shuttle
mounted off steering column.
Creep speed fitted as standard.

→ **Robust with a speed selection
to suit any operation**

HYDRAULICS

31 l/min high capacity hydraulic flow
and excellent lift capability.

→ **Enough flow and lift to handle
the most demanding implements**

SERVICE AND MAINTENANCE

Single piece rear hinged hood
exposes complete engine area.

→ **Easy access for quick simple
daily checks of oil and liquid**

HYDROSTATIC STEERING

Easy operation and 55° steering angle.

→ **Excellent manoeuvrability**

FRONT AND REAR AXLES

Heavy duty front and rear axle
allows high axle loading.

→ **Axles with large load carrying
capacity and effective braking
when towing heavy loads**

DIMENSIONS

Ideal dimensional size and weight
for this horsepower class.

→ **Tractors can work safely
in confined areas without
risk of being too unstable**

4050 ROPS

INCLUDES TITAN 5500 LOADER
& 4 IN 1 BUCKET

\$31,900 + GST

4060 ROPS

INCLUDES TITAN 5500 LOADER
& 4 IN 1 BUCKET

AGROFARM 115GS

THE FARMER'S CHOICE.

The Agrofarm 115GS is a fantastic all-round farm tractor, offering power, manoeuvrability and simplicity of use.

4 cylinder, 4 litre diesel engine with individual Bosch injectors and engine speed programming function.

30:30 transmission complete with 40 km/h road speed, wet clutch shuttle with Sense Clutch modulation control.

4 Speed PTO incorporating economy speed allowing you to work at lower engine RPM.

Heavy duty quick detach Agrolift loader complete with 3rd Function, Soft Ride and Euro Hitch.

The farmer's choice Agrofarm 115GS and Agrolift loader
RRP \$85,900 + GST

110^{HP}

5105.4G HD

THE HEAVY DUTY, EVERYDAY TRACTOR.

The **NEW** 5105.4G Heavy Duty tractor, comes with larger rear diffs, bigger front axles, various wheel options and superior driver comfort for higher outputs and enhanced return on investment.

Features a 4 cylinder 3.8 litre FARMotion Common Rail engine which produces 102 HP. This is a high torque engine which optimises fuel efficiency.

The wet clutch power shuttle lever has an adjustable Sense Clutch control function to change the reaction time. The roller wheel can set five different levels of speed sensitivity to improve driver operation to the job in hand.

The 3640 Agrolift loaders designed for Australian conditions on the 5105.4G Deutz-Fahr tractor includes 3rd Function, Euro II Hitch, soft ride and easy to use joystick control.

The great combination package 5105.4G HD and Agrolift loader
RRP \$94,700 + GST

SENSE CLUTCH

SPECIALIST SERIES

EUROPEAN SPECIALIST CHAMPIONS.

Deutz-Fahr has always been one of the leading European manufacturers of specialist tractors.

A particularly vivid example of how these decades of expertise have been put to use is the evolution of the excellent Agroplus range.

The slimline designs were conceived to cater for all the needs of the specialist crops such as vineyards, citrus and avocados. Tractor overall widths start from one metre!

Conventional tractors are often used in vineyards, a simple mudguard and a wheel change gives great driver comfort and plenty of horsepower, a 5105.4G pictured here.

The Agroplus Profiline comes with a flat platform and has a narrow overall width of 1650mm. The compact Agroplus tractors are manoeuvrable and versatile with a range of technical features without comparison.

This includes electronically controlled engines, reduced engine speeds at 40 km/h and powershift transmissions with powershuttles.

The Deutz-Fahr range of products in this area is extensive, please be sure to discuss your individual needs with a Deutz-Fahr professional.

INTRODUCING THE NEW 5115 DF TTV SERIES

The new 5115 TTV, already winner of Tractor Of The Year, brings a complete new dimension to the specialist range of tractors. A vario transmission, stage 4 cabin and closed centre hydraulics are just a few of the many features packed into the new Agroplus tractors:

- 113 HP 4 cylinder FARMotion Stage III B engine, improved cooling system with eVisco fan.
- SDF T3500 CVT transmission with two automatic speed ranges, maximum speed 40 km/h at economy engine speed.
- Top of the range cabin with Stage 4, also new roof with liftable rear top for high visibility.
- 3 speed PTO 540/540ECO/1000, rear lift with advanced electronic control.
- 100 l/min LS pump hydraulic system, 9 electro-hydraulic distributors package.
- Four pillar suspended cab with flat floor and multi-functional armrest, central console with adjustable steering column and InfoCentrePro.
- Front 280/70R20 Rear 380/70R28, other tyres option available.

2WD SERIES

The 'Italian Look' series of 2 wheel drive (2WD) tractors gives you an economical solution to buying a new utility tractor, whilst attaining many operational benefits as well. The key benefit to having a 2WD tractor is the small turning circle, simple design and affordability. Smaller 2WD tractors are the most comparable to the 4WD range but often have a much better price point and manoeuvrability.

They can be used on livestock, orchard, vineyard or crop farms for jobs where manoeuvrability and a sharp turning circle are more important than pulling power. Talk to your Deutz-Fahr dealer today an experience one of these 2WD beauties for yourself!

FRUTTETO

The SAME Frutteto offers extraordinary scope for configuration to cater for every specific need. Boasting a modern design, simplicity, affordable pricing and sturdy construction, the SAME Frutteto is a tireless worker with impressive manoeuvrability.

The Frutteto series embodies the essence of simplicity, with a single piece cowl, SDF 1000 series engines, a low driver seat, short wheel base and outstanding agility and manoeuvrability. Ideal for orchard and vineyard work, these tractors strike the perfect balance between superior performance and low running costs.

DEUTZ NOW POWERED BY TRIMBLE

Deutz-Fahr tractors are excited to announce the new venture with Vantage NSW to offer Trimble Agriculture products on the Deutz-Fahr range of tractors in Australia.

With the latest Trimble GFX-750™ 10.1" easy-to-use touch screen display and roof-mounted guidance controller, your cab will be clean and clutter-free with this automated guidance system. The GFX-750™ also allows you to sync existing farm data to speed up the farm introduction process.

We are able to offer three levels of precision to suit your needs:

RangePoint™ RTX

An affordable entry-level paid subscription satellite system with **5cm** pass to pass. Satellite delivered, with a fast start-up time suitable for most farming applications.

Centerpoint™ RTX

RTX technology providing **2.5cm** repeatable high accuracy GNSS positioning. The premier satellite service delivering accuracy without a base station.

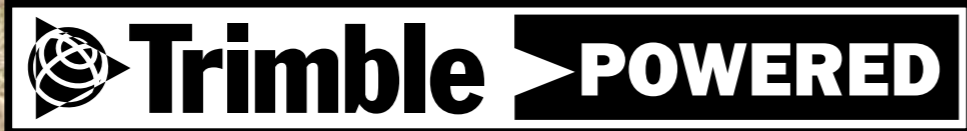

GFX-750-RTK

Greater than **2cm** repeatable for jobs that require the highest level of precision. xFill to keep you working during outages.

Deutz-Fahr will be releasing all Trimble options shortly, commencing initially with the 6 cylinder range of tractors.

*Disclaimer

95% performance based on in field measurements. Achievable accuracy and initialization time may vary based on type and capability of receiver and antenna, user's geographic location and atmospheric activity, scintillation levels, GNSS constellation health and availability and level of multipath including obstructions such as large trees and buildings.

GFX-750™ DISPLAY

Large 10.1" (25.6 cm) high visibility, high-definition colour touch-screen display

Android-based operating system allowing you to customise the display

Rugged construction for everyday field use, meeting demands in the harshest environments

NAV-900 Guidance Controller allowing a seamless operator experience

Integrated camera with support for an additional external camera

Easily transferable between vehicles

6G SERIES

THE ECONOMICAL WORKHORSE DESIGNED FOR AUSTRALIAN CONDITIONS.

German Deutz TCD (Tier 3) Common Rail 6 cylinder engine providing massive torque and phenomenal fuel economy, no AdBlue or DPF.

All 6G tractors have cab suspension, and front suspension on the 50 km/h models giving a superior comfort and better traction.

RC-Shift and Powershift ZF German transmissions available in the 6G range providing either ease of use Powershift or robotised auto operation to suit your farming setup.

PowerVision cab design with exceptional comfort and ergonomic control, and air-conditioning that can handle the harsh Australian heat.

Hydraulic options to suit all farm operations, high flow and free flow returns, 2-4 sets of remotes depending upon model, and high lift capacities on the linkage.

There is a choice of loader packages, using Agrolift, STOLL and Trima available with integrated joystick control, shock compensator and third service.

GERMAN QUALITY 6G SERIES BUILT AND DESIGNED FOR AUSTRALIA

The Deutz-Fahr 6G Series responds to the needs of customers who demand a tractor that not only delivers excellent productivity but also is inexpensive to run, easy to use and boasts simplified maintenance. These tractors are the perfect combination of several outstanding features, with tried and tested Stage III A compliant six cylinder Deutz engines matched with highly efficient ZF transmissions and class-beating hydraulic systems. This formidable package is clad with an eye-catching design, while the Deutz-Fahr brand is a guarantee of genuine German quality.

- The Deutz TCD 2012 engines (Deutz Common Rail) are entirely electronically controlled high pressure fuel injection and turbocharged forced induction with intercooler and wastegate. This offers outstanding performance in terms of both specific consumption and torque and power delivery.
- Powershift transmission fitted to the 6G PowerVision has 30/15 gears with 17 speed achievable between 5-20 km/h.
- RC-Shift automatic transmission with 54/27 gears, and armrest single lever control complete with Manual, Semi Auto and Automatic modes.
- Suspended air-conditioned cabin on all models and front axle suspension with 50km/h high speed heavy duty ZF transmission.
- Closed centre options up to 125 l/min hydraulics complete with Power Beyond and load sense connections.

6 SERIES 6 CYL

GERMAN QUALITY UNRIVALLED.

Latest technology 6 cylinder four valve Deutz Common Rail engine with No AdBlue and No DPF required.

RC-Shift fitted with armrest controls and electronic rear remotes. Vario transmission models also available.

Cabin and front axle suspension fitted as standard. Max 50 km/h road speed.

MaxiVision suspended cabin with detached hood feature to give the operator a quiet armchair ride.

High flow 120 l/min closed centre hydraulics comes with Power Beyond and load sense lines.

4 Speed PTO incorporating economy speed allowing you to work at lower engine RPM.

Front linkage and PTO models now available in Australia for immediate delivery.

Trima front end loader options available.

6 SERIES EXCELLENT DESIGN AND FUNCTIONALITY.

Deutz-Fahr launched the Agrotion Series in 1995, celebrating 25 years of exceptional industry leading designs. The Agrotion Series has extended its reputation for excellent design and functionality with the new 6 MaxiVision Series leading to further distinction. This tractor series is ready to demonstrate its versatility on all farms from cropping, to livestock and mixed farming, with the capability and technology to perform on larger farms and for contractors. The introduction of Trimble Precision Ag (see page 14) is another major step forward in excellence of performance and delivering customer demand.

- The 6 Series is powered by the new 6.1 litre Deutz 6 cylinder engine (6215) which develops over 800Nm of constant torque from 1100 RPM to 1900 RPM ensuring the engine will pull through all extreme conditions.
- The unique features offered by the MaxiVision II cabs can be seen inside and also from outside the cab. When it comes to ease of use and ergonomics, the new 6 Series caters for the operator by making best use of the current technology available.
- MaxiVision II suspended cabin with detached hood feature to give the operator a quiet armchair ride.
- The Trimble Precision Ag systems are now available upon request on new tractors using the latest GFX-750™ screens.
- Heavy Duty TTV variable transmission is available on the 6 Series Maxivision, designed allowing more mechanical power to be used compared to hydrostatic thus reducing fuel consumption.

PFG Credit has been in operation for 15 years across the whole PFG Australia product range. Our various finance packages ensure equipment repayments are tailored to your own cash flow requirements, whether that may be monthly, seasonal, or annual. A facility can be designed to conserve working capital, budget on a fixed rate, fixed term and fixed repayments to suit your individual farming needs.

PFG Credit allows clients to acquire equipment without a heavy initial down payment, which means you can pay for it from your operating budget and not from your capital reserves. This allows you to free up capital that can be used to grow other parts of your business.

KEY FEATURES:

- Quick finance quotations within the dealership
- Simple application with minimal financial data
- Tailored payment options
- Fixed interest rate
- Loan secured by equipment only
- Online loan agreements (contactless signatures from the comfort of your home)
- Streamlined next day settlements

Deutz-Fahr Australia has the option to buy now with no repayments until February 2021*. This enables you to take advantage of the Instant Asset Write Off initiative without major impact on your cashflow this year.

SPRING FINANCE OFFERS

- ➔ GST paid upfront, followed by 3 annuals from February 2021 @ **0.99%**^{P.A.}
- ➔ GST paid upfront, followed by 36 monthly repayments from February 2021 @ **1.49%**^{P.A.}
